nsaikumar233@gmail.com

PROFESSIONAL SUMMARY:

- I have overall experience of 6+ years in IT (5 years as a MuleSoft Developer) in collaborating on all stages of the systems development lifecycle, from requirement gathering to production releases.
- Good experience in Anypoint Studio and Anypoint Platform. Experience and understanding of Web Services (Both REST and SOAP). Working on Transformation Tools like DataWeave and Mule Connectors.
- Experience in configuring APIs, proxy endpoints, API portals and API analytics based on technical specifications with Mule Soft API manager. Provided expert technical support for MuleSoft applications, diagnosing and resolving integration issues promptly to minimize downtime.
- Good experience in Deployment of the applications CloudHub. Experience in working in agile methodology and C4E tasks.
- Designed and developed complex MuleSoft integrations to connect various systems, ensuring seamless data flow and process automation.
- Effectively managed support requests through JIRA, ensuring timely resolution of integration issues and maintaining a high level of customer satisfaction.
- Experience in using Database, WSC, HTTP Connectors for integration with external systems. Ability to work as a team and plan effectively, coordinate & meet deadlines.

PROFESSIONAL EXPERIENCE:

SURNOI TECHNOLOGIES PRIVATE LIMITED

Consultant

TCS

Senior Associate Consultant

INFOSYS

Associate Consultant

AMRUTHA INFOTECH PVT LTD

Senior Software Engineer

Hyderabad

01/2024 to Till Date

Hyderabad

08/2022 to 02/2023

Hyderabad

06/2021 to 08/2022

Hyderabad

06/2019 to 05/2021

EDUCATION:

Bachelor of Engineering

Graduating: Aug 2013 to June 2017

University: Jawaharlal Nehru Technological University Hyderabad

Relevant coursework: Electrical and Electronic Engineering

Percentage: 65%

CERTIFICATES:

MuleSoft Certified Developer - Level 1 (Mule 4)

Exp: 2026

TECHNICAL SKILLS:

ESB Technologies: Mule ESB, Anypoint Studio, Anypoint Platform, RAML, CloudHub, DataWeave, Jira, AWS SQS, AWS S3, Salesforce CRM, RabbitMQ, Kafka, api governance policies

Technologies: JAVA, JDBC, Servlets, JSP

Web Service Technologies: Web Services (REST), JAX-RS

Client-Side Technologies: HTML, JavaScript, Ajax, JSON, CSV

S/W Design Principles: Software Development Life Cycle (SDLC), Agile

Databases: Oracle, MySQL, SQL server, Azure Devops, Salesforce

PROJECTS:

Company: SURNOI TECHNOLOGY PVT LTD

Client: Independent Pet Partners

Mar 2025 – Till Date

Description: Developed online presence for an ecommerce client by developing order management systems by eliminating redundancies and automating processes. Integrated multiple platforms by devising REST APIs for data synchronization.

Roles & Responsibilities:

- Designed and developed MuleSoft integrations to support the Order Management System (OMS), eliminating manual redundancies and automating business processes.

- Built and exposed REST APIs to synchronize order, inventory, and customer data across multiple platforms.
- Implemented complex business logic and data transformations using Mule 4 and DataWeave 2.0 for real-time and batch integrations.
- Developed SFTP-based file processing solutions and integrated Azure storage for monitoring, archival, and backup purposes.
- Created reusable components, logging frameworks, and notification utilities for error and success scenarios.
- Secured APIs using policies in API Manager and deployed applications to CloudHub using GitHub and Jenkins CI/CD pipelines.
- Developed MUnit test cases, monitored APIs via Anypoint Platform, and provided production support and documentation.

Company: SURNOI TECHNOLOGY PVT LTD

Client: Discount Tire, 2-Way SMS

Sec 2024 – Feb 2025

Description: Built a solution that sends automated SMS to customers to enhance customer experience with the help of Salesforce, MuleSoft, and Zip Whip.

Roles and Responsibilities:

- Designed and implemented MuleSoft APIs to enable automated two-way SMS communication between Salesforce and Zip Whip.
- Developed and exposed REST and SOAP services using RAML and APIkit for seamless system integration.
- Integrated Salesforce with messaging services to trigger inbound and outbound SMS based on business events. Implemented business logic and message processing workflows using Mule 4 and DataWeave 2.0
- Applied API security policies in API Manager and managed API lifecycle through Anypoint Platform. Utilized connectors such as HTTP, Salesforce, JMS, VM, Database, File, and SMTP for end-to-end integration.
- Developed MUnit test cases, participated in code reviews, and deployed applications to CloudHub using GitHub and Jenkins.

Company: SURNOI TECHNOLOGY PVT LTD

Client: Teladoc Health

Jan 2024 – Aug 2024

Description: Integration API to API and both are bidirectional integration. By using platform event, we are going to create and update the patient details as per the client requirement we are doing middle of using logics and mappings to source and target and all the interfaces developed in MuleSoft.

Roles & Responsibilities:

- Created Mule Flows using End Point Connectors & Components using Mule ESB to integrate Client/Server systems.
- Created multiple utility APIs like sending notification for error and success scenarios to the client. Implementing business logic through mule flows and making connections with message.
- Created application for store the sftp location files into azure for monitoring and backup purpose with archival process like involved for multiple re-usable application to load this data.
- Migrated and enhanced the process flow using various connectors that need transformation mapping using MULE ESB.
- Used Anypoint Platform to deploy applications to the Runtime Manager. Applied Securities in Api Manager for API's. Implementation of custom logic in DataWeave.
- Sending an Email Notification when Exception raised. Developed Munit for the migrated APIs and Applications.
- Deployed the application through GitHub, Jenkins in CloudHub. Involved In preparing Documentation of various API's.

Company: TCS

Client: INTEL

Aug 2022 – Feb 2023

Description: Integration API to API and both are bidirectional integration. By using platform event, we are going to create and update the patient details as per the client requirement we are doing middle

of using logics and mappings to source and target and all the interfaces developed in MuleSoft.

Roles and Responsibilities:

- Responsible for deciding required time for migration and deployment of existing Mule3 APIs.
- Implementing business logic through mule flows and making connections with message.
- Migrated and enhanced the process flow using various connectors that needs transformation mapping using MULE ESB.
- Applied Securities in Api Manager for API's. Implementation of custom logic and Hands-on experience in Dataweave 2.0.
- Developed Munit for the migrated APIs and Applications. Responsible for setting up/defining the Integration Framework Development Standards, Policies, Develop & execute automated M-Unit Test Cases.
- Extensively used Mule Debugger to debug the XML Flows. Deployed the application through GitHub, Jenkins in CloudHub.

Company: INFOSYS

Client: AIRLINE

June 2021 – Aug 2022

Description: Airlines project is developed for customer chose ticket purpose; this project is to support the generation and translation of Service Events in the form of web services originating from different systems like Open Span, Clarify, Track Wise and Q&A repository are sent for data translation via IBM Cast Iron to the Lionbridge system. Translated data are then sent back to the respective Source applications via the same IBM cast Iron for further processing.

Roles and Responsibilities:

- Implementing Business logic through mule flows and masking connection with messaging services. Consuming and Exposing web service (Both Soap and Restful) by using Raml.
- Created RAML's with multiple resource paths and methods. Applied Securities in API Manager for API's.
- Developed flows on anypoint studio using APIkit Router by RAML. Generate private flows from RAML specification using APIkit.
- Experience in various connectors Http, Vm, Database, File, SMTP, and JMS, Salesforce. Involved in Munit for preparing test Cases.
- Experience in Batch processing Involved. Performs code reviews and design sessions with team members
- Deploying the application through GitHub, Jenkins, in cloudHub.

Company: AMRUTHA INFOTECH PVT LTD

Client: DELMONTE FOOD

Mar2020 – May 2021

Description: Del Monte Foods is a North American food production and distribution company headquartered in California, USA. Del Monte Foods is one of the country's largest producers, distributors and marketers of branded food for the U.S. Its portfolio of brands includes Del Monte, S&W, Contadina, College Inn, and Fruit.

Roles and Responsibilities:

- Created Raml's with multiple resource paths and method. Responsible for the analysis, design, implementation, and deployment of full software development life cycle.
- Applied Securities in API manager for A*5's
- Create and construct the intricate mappings, import flat files, WSDLs, and XML schemas, and construct XSLT. Help in creating and maintaining low-level design documentation and providing developers with recommendations for architecture and problem-solving by design patterns.
- produces thorough technical documentation for both recently developed and current solutions.
- Unit testing and Integration testing of the interfaces. Provide technical guidance and mentoring to team members.
- Involved in API development by using RAML. Developing APIs on Anypoint studio.
- Experience in Batch processing. Involved in Dataweave. Involved in Munit for preparing Test Cases.
- Design and ensure the performance, scalability, and reliability of integration solutions across a variety of enterprise systems.
